

Preliminary Data Gap Analysis
Pebble Project Environmental Impact Statement

Resource: Recreation			
Project Component	Analysis Component	Description	Data Recommendations
Mine Site	Effects Analysis	Additional information on existing and future uses at the Mine Site	Provide updated information on recreation use at/immediately surrounding the mine site or confirm no recreation use; provide information on allowable uses of the site post-closure of the mine; define recreation facilities to be provided at the mine site during operations for staff use
Transportation Corridor	Effects Analysis	Additional information on recreation areas along corridor	Attachment D indicates there are known recreation use areas along the corridor – provide a map of these areas and describe these use areas (location, access, type of use, estimate of use levels).
All project components	Effects Analysis	Information on commonly used plane landing zones	Provide map of airplane landing locations proposed for use by the project.
